SUBJECT: LBC Red List 2023 / PVC & Organohalogen Compounds

To whom it may concern,

I am writing to inform you that all of the products produced by Smile Plastics have been checked against the Living Building Challenge Red List 2023. We can confirm that none of the products produced by ourselves contain any of the materials, chemicals or elements on the current Living Building Challenge Red List: <https://living-future.org/wp-content/uploads/2023/04/LBC-Red-List-CASRN-Guide-2023.xlsx>.

This includes PVC and Organohalogen Compounds, both of which are not present in our materials in quantities larger than trace amounts that are below the threshold of 3% by weight.

Please contact me at the address above if you require any additional information.

Yours faithfully,

Lily Griggs
